

## **Xenergy** Honored by Congress for Clean, Green Technology

Carlsbad, CA – (Dec. 10, 2010) Xenergy has been honored by the United States Congress for its work involving clean, green technology.

The award was issued to **Xenergy** by **Congressman Darrell Issa** (R-CA), recognizing the company's "commitment, dedication, and professionalism" in its implementation of clean and green technology in its work. Awarded through the **San Diego North Economic Development Council** at an event held at the **California Center for the Arts** in Escondido, the honor specifically recognizes Xenergy's Outstanding Economic Development Contributions.

**Xenergy** brings clean, green technology into play in a number of high-tech industries by providing comprehensive energy solutions, including design and build, as well as the implementation of cutting-edge alternative energy technologies such as fuel cells. **Fuel cells** are receiving much attention due to their ability to generate electricity much more proficiently (in some cases, over 50% electrical efficiency) than traditional power plants, with virtually no air emissions. They allow large energy consumers to obtain independence from utilities and grid-based power, while experiencing long term cost savings, and have become a preferred technology for many consumers for that reason.

**Xenergy** has received a number of awards recognizing its excellent work and industry leadership. It has been rated the #1 Alternative Energy Provider by the **San Diego Business Journal**. The company's **Abbott Vascular Site Expansion** project received an award from the **Associated Builders and Contractors** in the \$10-\$99M category (2007), and their **Encinitas City Hall** Energy Retro-Fit won the SANDEE award for energy excellence (2008).

Jason Davis, CEO of **Xenergy**, says, "Xenergy's commitment to providing clean, green technology is furthered by our desire to save client companies unnecessary costs that they can use to create jobs or reinvest in their communities. Energy efficiency is a win for the environment and for the client's bottom line – and proves the point that smart energy usage is just good business."

### About Xenergy

**Xenergy** is an award-winning engineering, construction, and alternative energy leader. It has been rated the #1 Alternative Energy Provider by the San Diego Business Journal, and has extensive experience with construction of biotech, medical device, semi-conductor, high tech manufacturing and other critical care facilities. **Xenergy** is a member of the United States Green Build Council and is led by LEED Accredited professionals.
