

## **Xnergy Featured As Company Leading the Green Movement at SXSW® Interactive**

Carlsbad, CA -- March 21, 2011 – Xnergy is proud to announce that it was featured at this year's [SXSW® Interactive](#) in Austin, Texas as one of [Three Undiscovered Companies Leading the Green Movement](#).

Xnergy participated in SXSW® Interactive the week of March 11-15 (2011). SXSW® Interactive is five days of presentations from “the brightest minds in emerging technology” and networking events hosted by industry leaders, associated with the SXSW Festival renowned for its music performances. Xnergy participated in a panel moderated by Ben Lack, Chief Conversationalist at The [Daily Energy Report](#), a daily web show delivering top energy news and information from energy industry experts. The purpose of the panel, entitled “Three Undiscovered Companies Leading the Green Movement” was to feature companies that are encouraging the nation to “go green” with innovative strategies. The panel discussed ways in which American companies can operate in a more economical and environmentally friendly manner.

Justin Miller, Director of Business Development for Xnergy. He was joined on the panel by Andy Kruse of Southwest Windpower and Ingrid Vandervelt of Green Girl Energy. Xnergy is an award-winning engineering, construction, and alternative energy market leader based in Southern California, which leads the curve in the development and implementation of alternative energy technologies including fuel cells and solar energy. Xnergy was recently honored by Congress for its commitment to clean, green technology

Justin Miller said, “It was a privilege for Xnergy to be asked to participate and share our knowledge and experience within the energy industry with the SXSW Interactive attendees. Being part of SXSW allows us to connect with a motivated audience, and to help them find new and easy ways to save on energy usage and costs.”

Ben Lack says, "I was very pleased that our panelists were effectively able to convey that the green movement is gaining momentum. While there are still some real obstacles to becoming more responsible about our energy use, there are many people and companies who are interested in joining the movement. And our panelists were able to provide road maps to many who want to get more involved."

### **About Xnergy**

**Xnergy** is an award-winning engineering, construction, and alternative energy leader. It has been rated the #1 Alternative Energy Provider by the San Diego Business Journal, and has extensive experience with construction of biotech, medical device, semi-conductor, high tech manufacturing and other critical care facilities. **Xnergy** is a member of the United States Green Build Council and is led by LEED Accredited professionals.
