

Xnergy Selected for Remodeling of Residence Halls at San Diego Center for Children

Carlsbad, CA --(12/15/10) - Xnergy is proud to announce that it was selected by the San Diego Center for Children to upgrade portions of several of the residence halls on site.

SDCC (San Diego Center for Children) is San Diego's oldest accredited non-profit organization. SDCC was created to promote the well-being of children, youth, families, and communities by providing an array of proven and effective mental health, educational, and social services. SDCC has become a leader in providing mental health services to children and families within our community.

The project consists primarily of completely remodeling and upgrading 13 shower facilities for the children. Xnergy tradesmen will provide and install new wood wall framing as necessary in the existing shower stalls. In addition, a new moisture resistant Hardy Backer Cement Board in lieu of drywall and new porcelain ceramic tile was provided for the remodeling. Xnergy is also responsible for demolishing the existing shower valves and shower heads in the existing shower stalls and install thirteen new Symmons S-4701 Lexington Shower System shower valves and shower heads.

The ~\$150,000 remodel will improve the facilities for the disadvantaged kids and is part of a larger effort in improving social functioning and self image. The project will be funded using a Community Development Block Grant. Funded programs are those that serve 51 percent low- or moderate-income neighborhoods and residents within the City of San Diego. The majority of CDBG funds are used in acquisition, construction, engineering, development, and employment projects. Public service funded programs include: juvenile diversion/youth services, senior citizen services, persons with HIV/AIDS services, work rehabilitation services, homeless services, family violence/crime intervention and prevention services, and transitional living services.

Justin Miller, Director of Business Development at Xnergy states, "It is always enjoyable to be part of a project that truly benefits those who could use it the most. We are proud to have been selected by SDCC and look forward to continuing to help them maintain and upgrade their facilities."

About Xnergy
